Three Colour Friends

19 October 2026 • Magical Science Discoveries

An original Magic Garden poem • Read aloud or read along

Red met yellow by a tree,
'What could we make? Just wait and see!'
Side by side, they made a show,
A cheerful orange began to glow.
Blue met yellow, bright and clean,
Together they made a leafy green.
Then red and blue joined in the play,
And purple sparkled through the day.
Sarah smiled and Jessie knew:
New discoveries wait for me and you!

LET'S TALK: What new colour would you invent, and what would you name it?

Draw a tiny science discovery or magical friend in your imagination!
